Contract Access Certification Document

Since the certificate is an NFT certificate used in the MSCP service contract, tampering and sharing are prohibited and must be owned only by the user. A public certificate is an important means of authentication for identity verification when signing contracts between contractors. If disclosed to others, the certificate may be tampered with and may be vulnerable to security. That certificate should only be owned by you. The certificate is protected by the NFT blockchain.

Owner Identification ID : 021f8f78-0768-43f2-837a-e5520394asrd

Owner Nickname : tester1

Owner Name : *Kim Test*

Owner Email : test@test.com

Date of issue of certificate : *Thu Jul 27 2023 23:24:57 GMT-0900* (대한민국 표준시)

Owner Signature : *Kim Test*
